

THIS TREE

- + 5, 275, 000 kilojoules of energy
- + 9,960 liters of water
- + 367 kilograms of CO₂
- + 140 kilograms of solid waste

= THIS STACK OF PAPER

This stack of paper is 7,500 sheets, which is about what the average office worker uses in a year.

This is equivalent to one tree...

IS IT WORTH IT?

Think before you print and if you must, please double side.
